

Why do spiders eat flies?

Maths Fluency Ladder	
6	Subtracting 1 (within 10) (EYFS)
5	Adding 1 (within 10) (EYFS)
4	Say 1 less up to 10 (EYFS)
3	Say 1 more up to 10 (EYFS)
2	Count back in 1s to 20 (EYFS)
1	Count on in 1s to 20 (EYFS)

Can you continue with fluency games this week? Can you chalk numbers to 20 onto the ground. Can one person select a number and the fastest person in the family to splat it is the winner! How quickly can you add one more or one less to the number you splat? 😊

Maths

Can you revisit those skills for adding one more and one less as quickly as you can? If your children can do this speedily can you begin to ask for two more or two less and practice counting on and back. The quicker the children can recall addition and subtraction within 10 the better prepared they will be for year 1.

Can you use natural resources collected from your gardens to make symmetrical butterflies?

Can you use resources from outside or minibeast toys to find the total in two groups of objects by counting all of them? Can you then write them as a simple sum?

Reading

This week can you read and enjoy your favourite minibeast stories describing all the lovely information you now know about minibeasts! Can you look online for non-fiction texts about minibeasts and learn which are insects and which are not and why?

- https://www.youtube.com/channel/UCo7fbl_gY2oAcFClg9GdxtQ Please use the link above to find the **daily speed sounds lesson** to support early reading.

The newest version of Pie Corbett's Reception units are available via our school website and I will email them to you.

Ideas of other activities to be done throughout the week:

Writing / Drawing

Can you challenge yourself by making what am I? quizzes for your family! Use the information you know about minibeasts to help give clues to your family!

What am I?

- I have got eight legs.
- I am black and brown in colour.
- I live in a web.
- I like eating flies.

I am a **spider**.

With the natural resources you have collected from outside can you make some transient art minibeasts? Make sure you look closely at pictures to remember all their body parts!

Can you print or find some real images of minibeasts for your children to complete some line drawings of? Can you support your children to notice the shapes to help their real-life drawings.

You could also begin to write some of your children's favourite mini beast stories such as the very hungry caterpillar? You could work together to change the character to the very hungry spider or the very tired butterfly and make your own minibeast stories and drawings.

Please send your own lovely ideas on dojo for us to see <3

Can you make some squirmy jelly worms to eat or trick your siblings with? Or can you make some tasty minibeast treats? Can you work as hard as the very busy spider and busily weave a web to catch some snacks?
